Bucks (to wit).—*To Her Majesty's Justices of the Peace assembled at the* GENERAL QUARTER SESSION OF THE PEACE, *to be holden at* AYLESBURY, *in and for the said County, on* MONDAY, *the 31st day of December, 1883.*

THE ANNUAL REPORT

OF THE COMMITTEE OF VISITORS ELECTED AT THE EPIPHANY SESSION, 1883, FOR THE PURPOSES OF THE LUNATIC ASYLUM AT STONE, FOR THE PAUPER LUNATICS OF THE COUNTY, UNDER THE STATUTE 16th and 17th VICT., CAP. 97, ss. 22 and 62.

SHEWETH,—That your Committee report (in the terms of the Statute), that the "State and Condition" of the Asylum have been satisfactory throughout the year, and the accommodation is sufficient and proper for the number of Patients.

The conduct and efficiency of the several Officers and Servants have been satisfactory.

The full number of Patients on the 14th day of December, 1883 (the day of the last Meeting of your Committee), was as follows :—

	M.	F.	Total.
County Patients	162	247	409
Out-County Patients	16	14	30
Private Patients	14	2	16
On Probation : Out-County Patients	1	1	2
Total	193	264	457

The Number of County Patients in the Asylum at the corresponding period of the year ending 15th December, 1882, was 415.

The Asylum is constructed to accommodate 210 Male and 270 Female Patients, in all 480.

The number of Patients admitted since the commencement of the year 1883, has been :—

	M.	F.	Total.
County Patients	39	39	78
Out-County Patients	21	28	49
Private Patients	5	1	6
Total	65	68	133

The amount per head per week charged to the Unions in the County, having Patients in the Asylum during the four quarters, has been a uniform charge of 9s. 11d., being an increase of charge of 3½d. per head per week as compared with the charge made for the year 1882.

The following is a Table showing the cost of maintenance :—

TABLE SHOWING THE COST OF MAINTENANCE.

Column 1 contains the Cost of Provisions consumed by the Patients.
" 2 the Cost of the Fuel and other necessaries.
" 3 the Cost of Clothing, Utensils, Surgery, Garden, and Miscellaneous Articles, after deducting the Receipts of the Establishment.
" 4 the Amount of Salaries of Officers and Servants, and Cost of their Uniforms and of Provisions consumed by them.

	1.		2.		3.		4.		Total of Columns Nos. 1, 2, 3, 4, being the Total Cost on which the rate of Maintenance of the Patients is calculated.	Rate of Maintenance per Patient per Week.	Rate of Charge on the Unions per Patient per Week.	Aggregate Number of Days' Maintenance of Patients.

1883	192	263	455

Two of the Commissioners in Lunacy visited the Asylum on the 24th day of January, 1883, and the following is a copy of their Report upon that occasion :—

BUCKS COUNTY LUNATIC ASYLUM,

January 24th, 1883.

The annual inspection of this Asylum has occupied us to-day, and during it we have seen all the Patients in residence, and have visited all the Wards.

There are on the Books the names of 439 Patients, 405 of whom belong to Buckingham Unions and County, 19 to Out-Counties, and 15 are Private Patients. In respect of sex, 182 are Males and 257 are Females. Two Women are absent on trial. The weekly charges are for the above classes, 9s. 11d., 14s., and 14s. to 21s. respectively. The vacant accommodation is sufficient for 28 Males and 13 Females. Since the last visit of Commissioners, viz., on February 9th, 1882, 63 Males and 58 Females have been admitted; 44 Males and 32 Females discharged, and 15 Males and 22 Females died. Of the Patients who were discharged, 60 in all had recovered. There are, we think, many Patients in the Asylum who might, where there any pressure for room, be transferred to, and properly cared for in the Workhouses of their Unions. Should this pressure occur, this mode of relieving it, should not be lost sight of.

We have examined the assigned causes of the deaths. Six of these were due to Diarrhœa; and we learn that in November and December many cases of this complaint occurred in the Female division, to which it was entirely confined, but none of them proved fatal. There is nothing calling for particular notice in the causes of the remaining deaths. The rate of mortality in the interval since the last visit has been 8 per cent. of the average daily number resident, and the recoveries were in the ratio of one to two of the admissions. No Coroner's Inquest has been necessary, and there has not been any fatal casualty. One, not fatal though serious, was the scalding of a Patient in a bath. This arose from the officious interference of another Patient, who in the absence of the Attendant from the bath-room, turned on both taps, but water flowed only from the hot water tap, the supply of cold water being insufficient, and in the bath thus filled placed the patient, who was scalded. The attendant was guilty of a serious breach of the rules in leaving the bath-room unguarded, and has been reprimanded, his long service and previous good conduct inducing the Committee to abstain from dismissal.

This occurrence has called attention to the inadequacy of the cold water cisterns, and two additional ones are to be placed in the Water Towers.

In nineteen instances the cause of death was verified by *post mortem* examination.

At present the Patients generally are in good health. To-day there were only ten confined to bed, and the number under Medical treatment last week was 29. There are 63 Epileptics in nearly equal numbers of the sexes, and of them 28 Males and 27 Females are at night under continuous supervision. The Generel Paralytics are four only, all Males.

No Patient was secluded or restrained to-day, and none have been restrained since the last visit, but seven Males and five Females have been secluded, the former for a total duration of 254, and the latter of 41½ hours.

Although there are now more Patients, the average attendance at Divine Service, returned to us as about 76 Males and 75 to 85 Females, appears to be less than at the date of our Colleagues' visit last year. The Chapel is not filled, and we think that efforts should be made to secure a better attendance. The numbers, too, of those who are present at the associated entertainments should be greater, and so also of the Patients who get more extended exercise than the airing Courts afford.

The Males usually employed are 108, and the Females 120, in number. These are only 59 per cent. and 46 per cent. of the totals of the Patients of the Male and Female sex respectively, and the numbers include those who assist merely in Ward cleaning. Here again there is, we think, room for improvement.

The Patients were very quiet and well-behaved during our visit to the Wards, and we find their dress clean and good. A larger proportion of the women have now Winsey dresses, and the number will, we are glad to hear, be further increased. No complaints of ill-usage, except one or two obviously unreasonable, were made against attendants, nor any of the food. The only unpopular dinner, so far as we could learn, is that of which Soup is the staple, which is given once a week.

The Dayrooms and Dormitories are kept clean and bright, and the

beds and bedding are good and properly looked after. In the Female Infirmary (No. 4) we found the temperature too low, and the heating apparatus does not appear to work efficiently in this Ward.

The Diarrhœa which appeared on the Women's side was probably due to some defective sanitary arrangement. Inquiring into this matter we observed that in some of the Water Closets which are flushed by door action, there was a deficiency of water. Some Closets have been altered and improved, but in all, the soil pipes are carried up inside the building instead of outside. Sewer pipes, too, are in places laid under the Wards. It appears, too, that the Main Drains leading to the Sewage Tanks are ventilated, if at all, only at the back of the building, and not between the tanks and the building. It seems probable that the tanks themselves are unnecessarily large, and also insufficiently ventilated. We recommend attention to these matters with a view to improvement. Waste pipes from sinks and baths are in some instances now directed into an outside pipe carried above the eaves and serving as a ventilator. This is an improvement ; but is not so effectual, in our opinion, as discharge in the open air upon a trapped grating.

The attendants appear to be respectable, and the staff adequate in most Wards; but in Male Ward, No. 11, where 20 Patients are in charge of a single attendant, another should be at once engaged. In No. 14 Female, too, three nurses are scarcely enough for 51 patients ; nor are three attendants sufficient for the care of the 44 rather troublesome women in No. 6, or the 46 men, of whom 14 are epileptics, in No. 5. The night staff is sufficient.

We regret to find, that although a Manual Fire Engine was procured a year ago, a Fire Brigade has not yet been organised, nor rules drawn up. This important matter should be attended to.

Examining the Statutory Books and Registers, we observe that during the last six months, in the Register of Admissions; "the form of Mental Disorder," "Supposed Cause of Insanity," and "Bodily Condition and Name of Disease (if any)," have not been filled in, in their respective columns, and in this respect the Lunatic Asylum Act has not been duly complied with.

There have been a few Structural improvements since the last visit; a new Steam Pump, for supplying the Laundry with Rain Water, which is now separated from the general supply, and the erection of an Engine House, and new Painter's Shop, are the principal.

(Signed)

C. S. Bagot, } Commissioners
John D. Cleaton, } in Lunacy.

Your Committee, in reference to certain of the observations contained in the Report of the two Commissioners in Lunacy, who inspected the Asylum on the 24th January, 1883, would mention, that, as regard the Deaths which occurred during the year 1882 from Diarrhœa, it will be seen by the Report of the Medical Superintendent, that Diarrhœa has been much less prevalent during this present year, than in the preceding year, and does not appear to be due to any defective arrangements. In reference to the observations as to securing a better attendance at Chapel, the exercise of the Patients, and the employment of them, the Medical Superintendent informs your Committee, that the attendance at Chapel varies according to the Season of the year—that some of the more Feeble and Infirm Patients are not willing to turn out in cold weather, but that in Summer the Chapel is nearly full; that there are about 70 Epileptic Patients, and that very few of these are fit to attend Service. Some of these he is obliged to keep away, against their will, as they scream so loudly before the fit comes on, or knock about and snore during the fit; and there are a few who could, and ought, to attend, but are too apathetic and indolent to do so; and with regard to extended exercise, that it has been the rule, for the last eleven months, to take round the Grounds parties of Female Patients from each Ward, twice a week, so that all who are able to walk, and are in a fit mental, and bodily, condition, to do so, have the opportunity of going, and that this exercise is in addition to the Walking Parties on the Road, on Sundays, and Wednesdays; and in reference to the employment of the Patients, he states that it has been customary for the Attendants, in their Daily reports, to enter the names of those Patients only, who are regularly

employed, and that there are a large number of Demented Patients, who are only capable of some slight occupation, and these have not hitherto been included in the list of Patients employed, though usually doing some little work during the day; and that the addition of these to the list of those regularly employed, will increase the percentage of the employed Patients, from 46 per cent. to 60 per cent. on the Women's side, and that on the men's side, the number employed is 61 per cent. of those resident; an average that cannot be easily increased. Referring to the paragraph in the Report of the Commissioners on the Ventilation of the Drains, and Water Closets, the Committee have ascertained that the Tank in the Garden has been reduced to half its depth, and therefore it will contain only about half the quantity of sewage; also that the communication between the Tank and the Drains is left open, so that any foul air from the former does not draw up into the latter; that nearly the whole of the Sinks and Baths on the Women's side, and more than one half on the men's side, discharge through pipes outside of the Building, and have ventilating pipes; and that many of the Water Closets are also ventilated by pipes leading into the open air, an improvement which will be applied to all where practicable. That in reference to precautions against Fire the Committee have to state, that Rules have been drawn up, and are printed and circulated throughout the Establishment; that a Fire Brigade of Two Divisions has been established, and both Divisions have had practice with the Fire Engine, and will continue to drill every month; that the tank at the Farm is sound, and keeps full of water, and Buckets full of water are placed ready in each Ward every night; that two more Hand Pumps have been placed on the Women's side, and there are now four ready for immediate use, placed in different parts of the Building on that side; and that on the Men's side there are two similar stations, but that the east end of No. 14 Ward, and the Laundry, are still without an adequate Reservoir of Water; and with regard to means of escape in the event of Fire, there are two staircases to every Ward, except in No. 14, and an iron staircase, to be fixed outside the Building, has been decided on for this Ward, and will be at once provided.

RESIDENT ENGINEER.

During the month of January, 1883, Mr. Edmund Packham, the Resident Engineer, died after a short illness, and your Committee, on the 16th February following, after an advertisement inserted in certain papers inviting applications for the appointment, received 84 such applications, from which they selected five persons for an interview, who attended a Special Meeting of your Committee on the 27th of that month, when Mr. Edwin Field, then holding the appointment of Engineer to the Canterbury Gas and Water Company (which he had held for upwards of six years) was appointed Resident Engineer, at the salary of £100 per year, in the place of Mr. Packham.

ADDITIONAL WATER CISTERNS IN THE TOWERS.

Your Committee report that the erection of an additional Water Cistern in each Tower referred to in the last Annual Report of your Committee, has been completed, and the further supply of water thereby afforded has been found of great benefit to the Institution.

In the Appendix No. 1 will be found an abstract of the Treasurer's Accounts, as to the repayment of instalments of the principal monies borrowed, and the interest thereon.

In the Appendix No. 2 is shown the amount expended in Repairs; and also the Additions, Alterations, and Improvements, under section 38 of the Statute.

In the Appendix No. 3 will be found a general statement and balance sheet of the Maintenance Account.

And in the Appendix No. 4 will be found an abstract of the Garden and Farm Account for the year 1883.

It is now the province of the Court of Quarter Session to appoint a Committee of Visitors of the Asylum for the ensuing year, pursuant to the 22nd sec. of the Statute.

(Signed) P. T. OUVRY,
Chairman.

MEDICAL SUPERINTENDENT'S REPORT.

To the Committee of Visitors of the Buckinghamshire County Asylum.

Gentlemen,

I beg to submit to you for your consideration, the following Report showing the general condition of the Asylum under your charge during the past year. The Statistical Tables appended are those recommended for general adoption by the Medico-Psycological Association, and will be found to give much additional information.

There were in the Asylum on the 16th of December, 1882, 178 Men and 259 Women, in all 437 Patients. During the year 1883, 133 Patients were admitted of whom 65 were Males and 68 were Females, but of this number 21 Males and 28 Females were brought from the Metropolitan Unions, and 5 Men and 1 Woman were received as Private Patients. The total number under treatment has thus been 570. The number resident at the end of our Financial Year, December 15th, 1883, was 455, and there were 25 vacancies, of which 18 were in the Male and 7 in the Female Division. The daily average number throughout the year was 182 Males and 262 Females ; total, 444.

The bodily condition of the Admissions during the year, has not been more favourable than usual. Three of the Males and two of the Females are Congenital Idiots, 11 Males and 3 Females were Epileptic, while in more than two-thirds of the Patients admitted, the Insanity had lasted upwards of three months previous to their being brought here. There were only two cases of re-admission during the twelve months, though 25 of the Patients had been under treatment in the Asylum in former years. As the Asylum gets older, the probability of an increased rate of re-admission becomes evident, as there are more persons in the County who have recovered from an attack of Insanity, and who are liable to relapse.

Seventy Patients have been discharged, of whom 21 Men and 28 Women had recovered, 2 Men and 10 Women were relieved; and 3 Men and 6 Women not improved. Of the 21 Patients who left, not recovered, 2 Men and 8 Women were transferred to other Asylums, 2 Men and 6 Women returned home to the care of their Friends, and 1 Man escaped. The Recovery rate, calculated on the Admissions, was 30·6 for Men, 45·6 for Women, and 38·4 for both.

There have been 45 Deaths, 25 Men and 20 Women. The mortality has been at the rate of 9·6 per cent. on the average daily number Resident—13·1 per cent. for the Males and 7·2 per cent. for the Females. Calculated on the total number under treatment during the year, the death rate was 7·8 per cent., nearly 2 per cent. higher than it was in 1882. The average age at death was for Males 58 years, for Females 59 years. The mortality among the Men was nearly double that of the women, and was owing to the much larger proportion of deaths from organic disease of the brain. The oldest Patient that died was a Male in his 86th year, who had been in the Asylum only 20 days, and the youngest an idiot boy aged 17.

More than one-half of the deaths occurred during the first quarter of the year, and the mortality was greatest in March, when 14 Patients died, Inflammatory Affections of the Lungs being prevalent in consequence of the continued cold weather.

One Coroner's Inquest has been held on the body of a Male Patient, who was found out of bed, dead at 5 o'clock in the morning of March 31st, having thrown up a quantity of blood from the rupture of a blood vessel in the stomach.

Three Men have escaped during the year, in two of the cases, the Patients were brought back in a short time. In the third case the Man had been accustomed to help at the Gas Works for the last 3 or 4 years, and thus had almost unlimited liberty. He was a useful Man, and if he kept sober would probably soon find employment as a bargeman (his former occupation).

The only casualty to report occurred to an elderly Female who, having been pushed down by another patient, sustained a fracture of the Styloid process of the left Radius. The patient, though very troublesome, in often removing the splint and bandage, made a satisfactory recovery.

No disease of an Epidemic nature has occurred in the Asylum, and the general health of the Establishment has been good. Diarrhœa has been very much less prevalent than during the preceding year.

In very few of the Patients remaining is there any reasonable prospect of recovery ; at the end of the year only 16—8 of each sex—are deemed curable.

I have to record the death of our Engineer, which took place last January. He had filled that office for about 28 years, and had always attended steadily to his duties. His successor, Mr. Edwin Field, came into residence in March, and has proved himself to be a very efficient Officer.

The additions to the Tanks for supplying Cold Water to the Wards have been completed and brought into operation. They were much needed, not any alteration having been made in them since the opening of the Asylum, when there were less than half the number of Patients than there are now.

Rules for the formation of a Fire Brigade have been drawn up, and the Attendants and Patients regularly drilled under the superintendence of the Engineer.

In concluding this, my twenty-eighth Report, I have to acknowledge the ready help I have received from the Officers and Attendants of the Asylum, and to express to the Visitors my thanks for the kindness and consideration I have always received from them.

I am, Gentlemen,

Your obedient Servant,

January 14th, 1884. J. HUMPHRY.

THOMAS LEWIS, Tailor.

CHAPLAIN'S REPORT.

To the Committee of Visitors of the Bucks County Lunatic Asylum.

Gentlemen,

I beg to present to you my Report for the year 1883; and in doing so must state there is nothing of any special importance as distinct from previous years to bring before you.

The Services have been held at the same regular times, and have been attended by about the usual number of Patients, many of whom take their part in them very heartily, and, we will hope, with some good results.

The Holy Communion has been administered the usual number of times.

My visiting in the various wards is continued on the same plan as hitherto; in most, I am able to read or speak to all who happen to be present, whilst those confined to their beds are, when able, most ready to appreciate individual visiting. This part of one's duties is often full of interest and encouragement.

I must add that I have received every help and kindness from all the Officials with whom I have been brought into contact.

I remain,

Gentlemen,

Your obedient Servant,

CHRISTOPHER RIDLEY.

Aylesbury,
December 13th, 1883.
